Classipress-Post-Sort-Plugin

The Classipress Post Sort Plugin is finally here!

This plugin allows users to sort Ads on your site with many options (listed below). It is a great value and one that your users will appreciate! Don't make your valued users have to navigate page by page, buy this plugin today!!

Users can sort by:

- Price Highest-Lowest
- Price Lowest-Highest
- Date Modified Newest
- Date Modified Oldest
- Date Created Newest
- Date Created Oldest
- Alpha A-Z

Admin Control:

- Control which sort options to enable
- Change the description of each sortable option
- Turn On/Off additional sort options
- Set a default sort option for first time visits

Classipress Sort Plugin Settings **Drop-Down Titles** Default Sort by Price Lowest: Price: Lowest Sort by Price Highest: Price: Highest Sort by Newest: Sort by Oldest: Oldest Sort by A-Z: Alpha: A-Z Sort by Z-A: Alpha: Z-A Sort by Modified Newest: Modified Date: Newest Sort by Modified Oldest: Modified Date: Oldest **Sort Options** Enable Sort by Price: Enable Sort by Date: Enable Sort by Title: Enable Sort by Modified: "Exclude Ads" Text and Options Enable Exclude Sold Ads: Exclude Sold Enable Exclude No Image Ads: Exclude No Image Ads Special Symbol to Ignore During Sort Usually A currency Symbol: (Warning: Only Enter 1 Character)

Instructions

Save Changes

Thank you for purchasing the Classipress Post Sort Plugin!

Below you will find some very easy to follow install instructions, including a link to a YouTube Video!

http://www.youtube.com/watch?feature=player_embedded&v=H6IiJpmOlyw

- Download the zip sent in a previous email , Upload to your ClassiPress theme via the admin plugin page.
- Once uploaded, activate it.
- Next we need add the sort function to 2 theme files, the "search.php" and "taxonomy-ad_cat.php".
 - In the search.php file we need to add this <?php if (function_exists('twg_tfsp_sort')) twg_tfsp_sort();?> right around line 36 (depending on what version you have). See screen shot 1 below for exact placement for version 3.1.7.

                                                                                        <h1 class="single dotted"><?php printf( __("Search for '%s' returned %s results", 'appthemes'), trim( strip.</pre>
                                                                                         php _e('Sorry, no listings were found.', 'appthemes')?>
```

In the taxonomy-ad_cat.php file, there is already a location. on line 28 you'll see a function like this <?php echo \$term->description; ?>. We want to include our function right next to this one so it looks like this <?php echo \$term->description; ?><?php if (function_exists('twg_tfsp_sort')) twg_tfsp_sort();?>

```
